6. Articles published (when/where).
  
7. Other healthcare related activities.
  
8. Please give a statement explaining why you believe you should be elected. (Explain your goals and what you can offer the association).

During the past five years I have had the opportunity to work with many knowledgeable people in the area of Central Processing, the Operating Room, Infection Control and Safety. I have experienced a variety of situations that have given me the understanding of the various complexities and importance of a Central Processing Department. My goals are to enhance my knowledge base and to advocate for safe and effective practices in Central Processing. I would like to continue working to increase membership and certification and to encourage Central Sterile staff to be active in this organization which has a wealth of knowledge. I would be pleased to be a resource for information for anyone in our field of work. I am honored to be considered to serve on the board of the NCAHCSP organization and collaborate with so many talented people.
